DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-11 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-8, 14 and 16 of copending Application No. 09/937508. Although the conflicting claims are not identical, they are not patentably distinct from each other because both inventions are drawn to a method of centering a liquid drop in a well-shaped cavity having identically defined structures. Again both inventions are drawn to a variable-focus lens using a liquid drop confined in a well-shaped cavity having identically defined structures. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the method of centering a liquid drop as claimed in independent claims 1 and 4 of the instant invention to achieve the same method of centering a liquid drop as claimed in independent claims 1 and 4 of Application No. 09/937508. Also, it would have been obvious to one of ordinary skill in the art at the time the invention was made create the variable focus lens as claimed in independent claims 6, 9 and 11 of the instant

Art Unit: 2873

invention to achieve the variable focus lens of claims 6 and 14 of Application No. 09/937508 wherein the structure for both lenses are identical.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

Applicant's arguments, see pages 1 and 2, filed March 23, 2006, with respect to claims 5 and 6 have been fully considered and are persuasive. The objection of claims 5 and 6 and the rejection of claim 6 under 35 U.S.C. 112 has been withdrawn. The rejection of claims 1-11 under the provisional obvious-type double patenting has been repeated.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
